10 Most Promising Dassault Systemes Solution Providers - 2019

From factory innovation to smart buildings to process industry optimization, Dassault Systèmes is miles ahead in fueling sustainable innovation across industries and geographical regions. A solutions provider that believes in transforming the way products are designed, developed, and maintained, Dassault Systemes has caught the attention of every progressive organization. At a time when the consumer experience is at the center of the business strategy in almost every industry, Dassault Systemes is helping organizations to not just deliver products, but high value.

Moving beyond its core expertise in the areas of 3D Design, Engineering, 3D CAD, Modeling, Simulation, Data Management and Process, Dassault Systemes has introduced 3DEXPERIENCE, a business platform that encompasses all aspects of product lifecycles—from product idea to design and development through distribution. The company feeds the field data back to the PLM system to be used as a key source for innovation. It has also introduced 3DEXPERIENCE Lab to support startups, entrepreneurs, designers, industrial innovation departments, and research laboratories with the open innovation laboratory. The lab helps companies bring together collective intelligence with a cross-collaborative approach to foster breakthrough ideas and innovation. Several solution providers create software applications which are fully integrated with Dassault Systèmes product line to meet the unique process and engineering requirements and achieve a future-ready IT infrastructure.

To help CIOs navigate through the list of Dassault Systemes solution providers, our distinguished selection panel, comprising CEOs, CIOs and VCs, industry analysts and the editorial board of CIOReview narrowed the 10 Most Promising Dassault Systemes Solution Providers - 2019 that exhibit competence in optimizing business and engineering performance and delivering enhanced user experience.

We present to you CIOReview's "10 Most Promising Dassault Systemes Solution Providers - 2019."

Top Dassault Systemes Companies

DesignPoint

On a mission to help our customers understand that 'More Is Possible' by developing trusted partnerships with them and produce game-changing results

Sigmetrix

Provides comprehensive, easy-to-use software solutions that help users achieve robust designs through tolerance analysis and the correct application of GD&T

SIMULIA

Powered by the 3DEXPERIENCE Platform, SIMULIA delivers realistic simulation applications that enable users to explore real-world behavior of product, nature and life

SolidCAM

SolidCAM provides the fastest tool paths and an efficient manufacturing suite for profitable CNC Programming inside SOLIDWORKS

CENIT

As a leading IT consultancy and software company, CENIT designs and builds digital processes to help its customers achieve technological leadership and safeguard their competitive advantage in the connected, digital future

Elysium

Elysium has been providing industry leading 3D interoperability and point cloud solutions throughout the world including industry leaders such as Boeing, Daimler, Renault F1 Team, Toyota and more than 3,500 other companies

Nuovamacut

Founded in 1955 as a machine tool distributor, today the Nuovamacut group, with a staff of 140 people operating in 10 different locations on the Italian territory, is the main partner of Dassault SolidWorks in Italy and among the top 10 in the world, not only for the resale of CAD / PLM software solutions, but it is the only service, training and consulting center certified in Italy by Dassault SolidWorks, with more than 4,700 customers

PROSTEP

Leading, vendor-neutral consulting and software company for any and every aspect of product lifecycle management

Simerics

Simerics develops advanced CAE softwares for virtual simulation and testing of mechanical systems catering to automotive, aerospace, marine, fluid power, and oil and gas industries

TECHNIA

Provides the customers with exceptional PLM solutions comprising of software, systems and services, for critical business processes
